

EEW-Kurzbeschreibung

EEW Energy from Waste GmbH (EEW) is one of the leading companies in Europe in the field of thermal waste treatment and sewage sludge. EEW Energy from Waste is already making an important contribution towards protecting the climate and resources and is a key player in the circular economy. Our corporate group currently operates 17 sites that can process around 5 million tonnes of waste per year. The more than 1,400 employees at our plants ensure that the energy stored in waste is utilised, the volume of waste is reduced, the hazards caused by waste are eliminated safely and without negative impact, and that scrap metals and compound materials are recycled. Moreover, we efficiently utilise the energy contained in waste to generate process steam for industrial plants, district heating for residential areas and environmentally sustainable electricity. In line with our vision for the future, we have set a goal to be climate neutral by 2030 and climate positive by 2040. A key measure in addition to carbon reduction will be carbon capture at our facilities. The captured carbon will be partly stored for chemical products in a carbon-neutral economy of the future.
