

Safety requirements for logistics companies

Cleaning work on vehicles

If necessary, platform ladders, platforms or scaffolding must be used to remove contamination or objects projecting over the tailgate.

! Makeshift solutions are strictly forbidden.

Accidents/incidents

EEW expects accidents/incidents which have occurred on the site of the plant, to be brought to the attention of EEW staff immediately (usually the control room or the weigh station). Any further measures (calling fire brigade, ambulance, etc.) will then be coordinated by EEW staff.

Road safety

Road traffic regulations apply on the whole site.

Ban on alcohol and smoking

Alcohol is strictly forbidden on the site.

Smoking is only allowed in specially designated areas.

Our aim:
No accidents in any EEW plants

- ! We attach especial importance to ensuring that the drivers of delivery and disposal vehicles remain safe and free of physical injury in all EEW plants.

Scope

This applies to all plants belonging to the EEW Energy from Waste Group.

Responsibilities

The logistics company is responsible for:

- provision of personal protective equipment
- instructing its drivers
- the technical condition of vehicles/containers (together with the driver of the vehicle)

- ! The instructions issued by EEW's weigh station staff and production personnel must be followed.

The following standards must be adhered to

Safety devices

The safety devices installed on vehicles (e.g. roof railing, steps, alighting aids, restraints, etc.) must be used when needed.

- ! All safety devices installed must be in perfect working order.

Containers

Containers, in particular the locking and unlocking mechanisms for the flaps, must be in perfect working order. If EEW staff find faults on containers or their superstructures during goods inwards inspection which could pose a risk for unloading the material, they will refuse to process that container.

Removing safety nets from containers

Safety nets must be removed from ground level by means of technical equipment (pole, hook, etc.) or with the aid of platform ladders or stepladders.

- ! It is strictly forbidden to climb onto containers in order to remove the nets.

Personal Protective Equipment

The following personal protective equipment must be worn/fitted:

- safety helmet
- safety shoes/safety boots
- safety vest
- safety glasses
- safety gloves

Small suppliers are exempted from this rule if it is ensured that unloading will take place into separately provided containers.

- ! EEW will not provide personal protective equipment.
